

MATERIAL SAFETY DATA SHEET

HAZARD RATING
4=EXTREME
3=HIGH
2=MODERATE
1=SLIGHT
0=INSIGNIFICANT

Reactivity Data

Stability: Stable
Incompatibility (Materials to Avoid): Does Not Apply
Hazardous Decomposition of By-products: Does Not Apply
Hazardous Polymerization: Does Not Apply
Conditions to Avoid: Does Not Apply

Manufacturer's Name: Preventive Technologies, Inc.
Address: 4330-C Matthews-IndianTrail Road
Indian Trail, NC 28079
Telephone Number: 704-849-2416 or 800-474-8681

Product Identification

Product Name: MAXmin™ Prophy Paste with NuFluor
Synonyms: MAXmin

Hazardous Ingredients

Hazardous Components: Fluoride Ion Sodium Fluoride
Active% (optional): 1.23%

Physical/Chemical Characteristics

Does Not Apply

Fire and Explosion Hazard Data

Does Not Apply

Health Hazard Data

Route(s) of Entry
Inhalation?: Does Not Apply
Skin?: Does Not Apply
Ingestion?: Does Not Apply
Health Hazards (Acute and Chronic): Does Not Apply
Monographs?: Does Not Apply
Signs and Symptoms of Exposure?: Does Not Apply

Emergency and First Aid Procedures

Eye: Flush with water. If irritation persists, contact physician.
Ingestion: Induce vomiting, consult physician.

Precautions for Safe Handling and Use

Steps to Be Taken in Case Material is Released or Spilled:

Does Not Apply

Waste Disposal Method: Does Not Apply

Precautions to Be Taken in Handling and Storing: Keep Away from heat.

Other Precautions: Does Not Apply

Control Measures

Does Not Apply

Frequently Asked Questions:

I am concerned about patient allergies. What do you recommend?

Allergies can be tricky and difficult to trace to a single chemical source. To eliminate the potential for dye, flavor or oil allergies, we recommend NADA® Pumice Paste or a "slurry of pumice."

Does this product contain gluten?

No, none. However, if concerned about allergies to food colorants, we suggest NADA® Pumice Paste.

What colorants are used in MAXmin paste by grit?

Medium: FD&C Blue #1 & #2

Coarse: FD&C Red #40

Again, if concerned about allergies to food colorants, we suggest NADA® Pumice Paste.

What sweetener is used in MAXmin Prophy Paste?

The sweetener in MAXmin is xylitol.

What do you recommend for polishing amalgams or composite restorations?

We recommend NEXT Prophy Paste Fine Grit since it contains no pumice. The key ingredient in our fine grits of NEXT® Prophy Paste is diatomaceous earth (jeweler's rouge).

What is NuFluor? Why add Calcium and Phosphate to Prophy Paste?

NuFluor is our unique chemistry blend of Fluoride, Calcium and Phosphate, specifically designed for prophy paste. Calcium and Phosphate are naturally found in saliva. Adding Calcium and Phosphate can help to maintain enamel integrity during challenges from plaque bacteria.

I notice MAXmin rinses easier and splatters less than my other brand. Why?

The proprietary formula of MAXmin is designed to minimize splatter. Our customers have told us that their patients want a clean rinse before they leave the chair. MAXmin will rinse cleanly and easily without using excess water. We're all consumers and it only makes sense to send them home with a good taste in their mouth and without all of the grit. MAXmin is the finishing touch on their office experience.
